Lowell Fire Weather Forecast

FORECAST NO: 2

NAME OF FIRE: Lowell

PREDICTION FOR: Wednesday July 29th

UNIT: NEU-Calfire

SHIFT DATE: 0700 Wed-0700 Thu

SIGNED: Ryan Walbrun

TIME AND DATE

FORECAST ISSUED: 1900 July 28th

Incident Meteorologist

WEATHER DISCUSSION: Continued hot and dry today with generally light terrain driven winds. Afternoon highs in the 90s once again with humidity values into the single digits or low teens. These conditions will keep fire weather conditions near critical and also put heat stress for those on the line. Stay Hydrated! Light easterly winds will continue through late morning before afternoon up-canyon winds develop. Less smoke production and a weak inversion may allow more sun to pre-heat the fuels today. For those working the night shift be aware of another night of very poor humidity recovery with light down-canyon winds dominating towards midnight and through the pre-dawn hours of Thursday.

WEATHER FORECAST For Wednesday:

WEATHER: Sunny and hot with very low humidity readings.

TEMPERATURES: Highs 93-98. Trend will be 1-3 degrees warmer.

HUMIDITY: Afternoon minimum 9-15%

20 FT WINDS:

RIDGETOP - Easterly 3 to 6 mph til 10 am then light through midday before turning Southwest 4-8 mph during the afternoon and early evening hours.

SLOPE/VALLEY - Downcanyon 2-5 mph through 10 am then afternoon upcanyon 4-7 mph gusts 10 mph through 8 pm.

HAINES INDEX: 4

STABILITY/INVERSION: Weak to moderate Inversion lifting by 1100

WEATHER FORECAST For Wednesday Night:

WEATHER: Clear with areas of smoke settling into the drainages. Poor humidity recovery with thermal belts developing between 2500 and 4000 feet.

TEMPERATURES: Mild with overnight lows in the 70s.

HUMIDITY: Poor recovery 20-30% most of the night...locally 40% where water drops have occurred.

20 FT WINDS:

RIDGETOP - Evening Westerly 4-8 mph turning East 2-5 mph overnight.

SLOPE/VALLEY - Downcanyon 2-5 mph setting up overnight.

EXTENDED FORECAST: Continued hot and dry Thursday. Highs 90s, lows in the 70s with diurnal winds. Upcanyon 7-10 mph afternoon and light downcanyon at nite. Slight cooling on Friday with increasing monsoonal moisture that will be watched into the weekend.

EXTRA INFORMATION: Observed weather on Tuesday was highs of 95-97 with RH 10-15%

FIRE BEHAVIOR FORECAST

FORECAST NUMBER: 3	TYPE OF FIRE: Wildfire
FIRE NAME: Lowell	OPERATIONAL PERIOD: 7/29-30/15 0700-0700
DATE ISSUED: 7/28/15	TIME ISSUED: 1900
UNIT: NEU – Nevada Yuba Placer Unit	SIGNED: 
	Typed/printed: Don Watt FBAN(T)

INPUTS

WEATHER SUMMARY:

The weather will be clear, with high temperatures and low humidity, and poor humidity recovery over the nighttime hours. High temperatures 93-98 degrees, minimum RH 9-15% with ridgetop winds from the east 3-6 mph in the morning, changing to southwest 4-8 mph in the afternoon. Valley and slope winds will be downcanyon 2-5 mph until 1000 changing to upcanyon 4-7 mpg with gust to 10 mph in the afternoon. Tonight temperatures will be in the 70's with the RH 20-30%. The wind on the ridges will west 4-8 mpg changing to the east 2-5 mph. The slope and valley winds will be downcanyon 2-5 mph.

Probability of Ignition: 90-100% during the day, 80 – 90% during the night

OUTPUTS

FIRE BEHAVIOR

GENERAL:

Minimal RH recovery and a thermal belt in the fire area will lead to fire behavior increasing earlier in the morning. The newer plantations with young trees have a lower canopy height providing for a higher potential for crown fire. The ground cover has a moderate load of 10 and 100 hour fuels in the older stands. In much of the fire the understory burned leaving the brush and timber canopy unburned. The fire pre-dried the fuel leaving a potential for a re-burn in these canopies. The weather will continue to be hot and dry with the diurnal winds have the most effect on the fire. Torching and crown fires will produce short range spotting.

SPECIFIC:

Branch I: The fire has had little activity in the past several days, but there is still the possibility of single tree torching and short runs in any remaining fuels.

Branch III & IV: The fire activity will increase early and be most active in the later afternoon. The fire activity will consist of slope driven runs and torching in the morning. The fire activity will be mainly in the pockets of unburned fuel in drainage. The afternoon winds will create wind driven runs. Short range spotting can be expected from torching trees. The canopy in unburned and still has the potential for a re-burn

AIR OPERATIONS:

A weak to moderate inversion will be over the fire area until 1100, which may limit early morning air operations.

SAFETY

Make sure lookouts are posted where they can see the fire activity in the bottom of the canyon, especially as crews start to work farther down slope.

SAFETY MESSAGE/PLAN (ICS 208)

1. Incident Name: Lowell	2. Operational Period:	Date From: 7/29/2015 Time From: 0700	Date To: 7/30/2015 Time To: 0700
------------------------------------	-------------------------------	-----------------------------------------	-------------------------------------

3. Safety Message/Expanded Safety Message, Safety Plan, Site Safety Plan:

Steep Terrain: Watch footing and rolling material Keep good spacing

Driving Hazards: Communicate travel routes and one way traffic, place special emphasis in DIV D

Levels of engagement: Ensure proper PPE to meet the mission. Adhere to and advocate LCES to your crews and adjoining forces.

Heavy Equipment Safety: While working around feller bunchers and falling modules, maintain open and effective communications at all times.

Poison Oak: Ensure all personnel are taking all precautions in limiting exposure. Wash PPE, utilize soaps and crèmes as needed. See MERT for any additional treatment .

Wildlife: Beware of wildlife in and around fire perimeter, multiple sighting's have been documented.

CONSIDER PACE

Primary Plan (Offense)

- Focused on FF safety and objectives

Alternative Plan (Offensive)

- Fallback plan that closely resembles primary plan

Contingency Plan (Defense)

- Focused on FF safety, move to safety zone, temporary refuge areas (TRA's)

Emergency Plan (Defense)

- FF survival
- Deployment zones/Refuge area
- Fire shelters

A black triangle with a white border. Inside the triangle, the word "Safety" is written in white. Above "Safety" is a large white exclamation mark. The word "Teamwork" is written in white along the left side, "Education" along the right side, and "Culture" along the bottom side.

4. Site Safety Plan Required? Yes ☐ No ☐
Approved Site Safety Plan(s) Located At:

WILDFIRE FIGHTING NEAR HIGH-VOLTAGE ELECTRIC TRANSMISSION LINES

OWNED By PACIFIC GAS and ELECTRIC

The purpose of this document is to provide safety guidelines to agencies involved in wildfire fighting near high-voltage electric transmission lines owned and operated by PG&E. Wildfire fighting activities will usually begin before PG&E staff can assist fire fighting personnel. Application of these guidelines will guard agency personnel from electrical hazards associated with fighting grass or brush fires near overhead transmission lines.

FIGURE 1

- ❖ Tactics should consider transmission lines to be an exposure requiring protection when threatened by fire. When possible, establish a Control Line to prevent the spread of fire into the area within 100 feet of and parallel to the edge of the outer most phase conductor.
- ❖ Smoke, ash, and incidental mist from fire fighting operations can contaminate the insulators on transmission structures. This contamination may cause a short-circuit to occur at the structure, creating an electrical hazard.
- ❖ Spot fires that may occur beneath the tower lines, normally do not generate enough smoke to create an electric safety hazard. Spotters should be able to safely work under the tower lines when spot fires are controlled quickly and are at least 100 feet from the main smoke plume passing through the tower lines.
- ❖ Small burning trees under the tower or steel pole lines that exceed the height of an individual present a real threat of creating a phase-to-ground short. Maintain clearance between the trees and fire fighting operations.
- ❖ The incidental light-colored smoke that has cooled and dropped from the heavy smoke plume represents no threat of being involved in a phase-to-ground short.
- ❖ When fighting a fire near high-voltage transmission lines, one should never direct the hose stream:
 - At wires or raise the hose stream above the height of an individual.
 - Into the heavy plume of smoke that is within 100 feet of the outside conductor.
 - At burning trees under the lines.
- ❖ Aerial drops of chemical fire retardant onto electric transmission lines should be avoided. This retardant can contaminate the insulators on a line, leading to arcing and short-circuits.
- ❖ Aerial dropping of water does not normally have negative effects on energized lines as long as a sufficient amount of water hits the conductors. Mist or light water trailing from water drops when mixed with smoke residue on insulators can cause arcing or short-circuiting of the line.
- ❖ The first PG&E representative on the scene after being notified of the fire will normally be a Troublemaker, a Lineman, or a Supervisor.
- ❖ The central alarm person who initially contacts PG&E should provide an accurate location of the fire and as to where the PG&E representative will meet Fire Department personnel.

AIR OPERATIONS SUMMARY

PREPARED BY: David A. Lopez

PREPARED DATE/TIME: 7/28/15 16:00

1. INCIDENT NAME: Lowell		2. OPERATIONAL PERIOD DATE: 7/29/15		START TIME: 07:00		END TIME: 21:00		SUNRISE: 06:01		SUNSET: 20:19											
3. REMARKS (Safety Notes, Hazards, Air Operations Special Equipment, etc.): * All GPS data to be collected (Degree, Decimal, Minutes) * Avoid aerial application of retardant or foam within 300' of waterways, bodies of water. If dropped in these areas, notify AOBD with Lat/Long, and estimate of gallons. * Power Lines in the Area * Track dip sites/ quantity taken/ and drop location* * Nevada County Airport (Grass Valley) Lat/Long N39° 13' 26.5" X W121° 00' 11.1" KG00 * Blue Canyon Helibase Lat/ Long N39° 16' 29" X W120° 42' 35.1" KBLU * Mather Airport N38° 33' 19.1" X W121° 17' 49.9" KMHR						4. Tom Webb COML IMT #1				County Nevada	State-CA	Latitude	N Longitude		W		

The convention calls for frequency lists to show four digits after the decimal place, followed by either an "N" or a "W", depending on whether the frequency is narrow or wide band. Mode refers to either "A" or "D" indicating analog or digital (e.g. Project 25) or "M" indicating mixed mode. All channels are shown as if programmed in a control station, mobile or portable radio. Repeater and base stations must be programmed with the Rx and Tx reversed.

FINANCE MESSAGE

DATE: Wednesday, July 29th, 2015

TIME UNIT

- Please come by the Time Unit and start your FC-33
- Vendor drop off your agreements to the Time Unit
- Shift Tickets need to be completed by line supervisor and turned in at the end of each shift.
- A Federal Time Keeper and Comp / Claims is co-located with CAL FIRE Finance
- See attached updated FC-33 worksheet
- See attached Shift Ticket examples

COMP / CLAIMS

- Report all injuries
- Property Damage must be reported to Comp / Claims and documented
- Report any Vehicle Damage

PROCUREMENT UNIT

- Offsite feeding must have prior approval of the Finance Section Chief
- Water usage report need to be turned into Comp / Claims

FROM THE DESK OF DOCUMENTATION

Lowell Incident
7-29-15

Who needs to turn in what?

Unit Logs (ICS 214's) are required by Strike Team Leaders and above. However, Crews, Engines and possibly other contractors working on the line or in camp, may be asked to fill them out, especially if there has been a significant event that may need to be documented, or if requested by your Supervisor. Ensure they are signed and dated and include operational period if applicable.

Copies of the Crew (ICS 224's) and Personnel (ICS 225's) Evaluations are sent to your home unit or business office. Therefore, it is imperative to provide the home unit or business name and address on the evaluation form.

Thanks for your help and cooperation.

COMMENTS:		
SIGNATURE OF UNIT ADMINISTRATOR:	TITLE:	DATE:

Instructions for Use of CDF 101 Property Certification of Location or Damage

Document Number: for use as a local number system or when attached to a FC-40 document.

Location / Incident Name: Enter the CDF facility property is assigned to. If submitting to an incident base, enter the Incident Name.

Incident Number: Enter the appropriate incident number

Unit: Enter the Unit the property is assigned to. If submitting to an incident base, enter the request number of the person certifying damage example E-320, C-14 or O-355.

Region: Enter the CDF Region where the property was assigned. If submitting to an incident base, enter the CDF Region responsible for the incident.

Date: Enter the date the P.L. or D. was completed.

The following items were: Enter either 'Broken', 'Left on Line', 'Damaged' or other status of the property.

Reminder, this form cannot be used in place of the STD-152 to certify Lost, Stolen, Worn Out or Damaged beyond repair property.

Date of Occurrence: Enter the date the property was broken, left on line or damaged.

Quantity: Enter the quantity for the line item.

Unit of Measure: Enter the unit of measure for the line item (example ea = each).

CDF Stock Number: Enter the PIN or stock number.

Description: Enter the description of the line item, indicate size, make, model and type. Clearly describe the item and provide adequate data to effectively identify equipment or property.

Property Number: Enter the CDF property number assigned to the line item, Capitalized or sensitive property must have their property number entered here.

Location of Items: Where is the property now (example, left on Division B night shift 8/1/04, Drop Point 2). A GPS coordinate, Station 22 or Unit Service Center may also be used to describe Location.

Remarks: Enter specific remarks here, how was the property damaged, what specifically is wrong with it.

Signature of Person Certifying Occurrence as Described:

Signature: The CDF Employee certifying the occurrence must sign.

Printed Name: Enter the printed name of the signature.

Title: Enter the title of the signature.

Date: Enter the date of the signature.

Unit Supervisors Approval:

If submitted on an incident this section must be completed by the supervisor of the property custodian. This may be the Strike Team Leader, Division Supervisor, Receiving and Distribution Manager, Supply Unit Leader, Logistics Section Chief, Agency Representative or Incident Commander.

If submitted at the home Unit this section must also be completed by the supervisor of the property custodian. This may be a Battalion or Division Chief.

Comments: Supervisors may enter comments of approval or disapproval.

Signature of Unit Administrator: Signature of Unit Supervisor reviewing the certification described.

Title: Title of the signature.

Date: Date of the signature.

Notes:

This document is NOT required if exchanging property at an incident base with the exception of capitalized or sensitive property assigned a CDF property number.

This document is required as certification when submitting an MRT to your local Service Center for replacement of property.

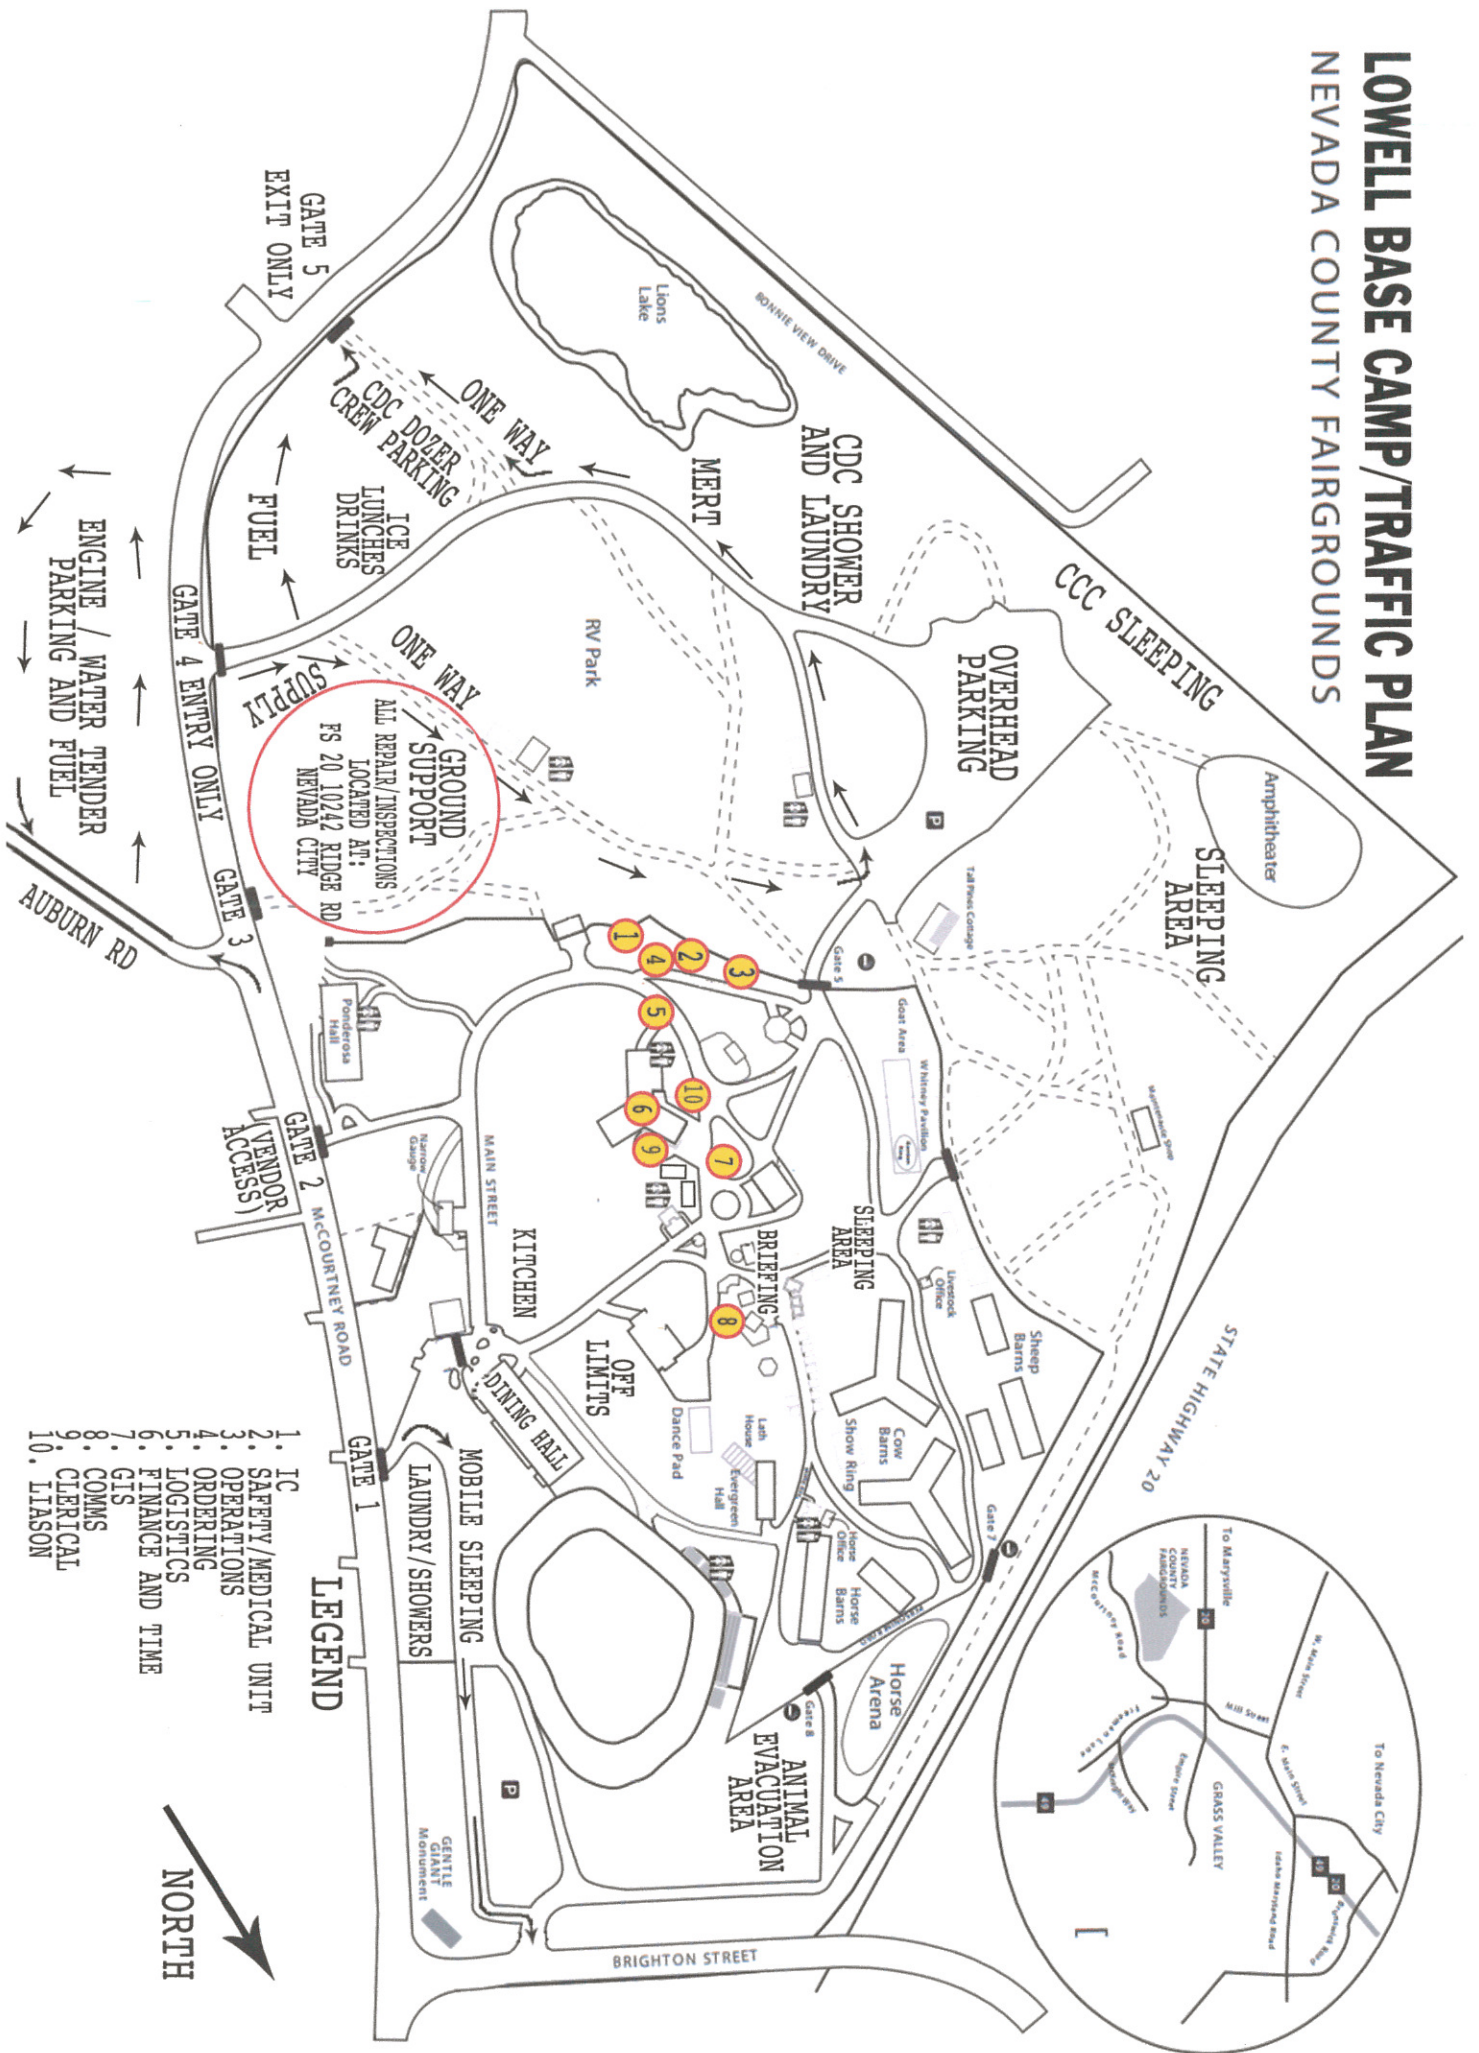

An OF-315 (Incident Replacement Requisition) is required as authorization to purchase fire replacement items at your local Unit. This document is required when submitting an MRT to your local Service Center for fire replacement items. A CDF-101 and/or A STD-152 are required for the certification of the status of property being requisitioned for replacement.
